

# Special Issue – Call for Papers

Korean Journal of Women Health Nursing

## Digital Era Education for Women's Health and Well-being To be published in September 2023

### Aims and scope

The COVID-19 pandemic induced changes that have potentiated digital transformation on multiple levels world-wide. Although the pandemic initially created gaps in educational support for women with health issues, adapting digital technology made new teaching modalities and supportive interventions possible. Meanwhile, in clinical practicum, stricter infectious disease management protocols and privacy concerns have doubled the challenge of preparing nursing students to adequately assess and meet the needs of women. In this context, digital technologies can offer teaching solutions that can reach women more effectively and support their health and well-being, as well as prepare nursing students to learn more effectively about women's health nursing.

The thematic scope of this special issue includes scientific issues related to the design and implementation or to the utility and usability of novel digital solutions, tools, and/or systems, provided that they contribute to women's health.

### Main topics

This special issue will focus on the design, development, evaluation, and use of digital solutions that support the health and well-being of women through education. Contributions should demonstrate how digital transformation based solutions support nurse clinicians and/or educators in enhancing women's health.

Contributions are solicited on, but not limited to, the following topics:

- Design and implementation of digital solutions to improve reaching and teaching women to manage and promote their health and well-being.
- Design and implementation of novel tools to help nurse clinicians and/or educators adapt teaching modalities for women, nurses, and/or nursing students, to the changing needs of the digital era.
- Topics include, but are not limited to, digital transformation, artificial intelligence, mixed reality (MR) modalities, etc., applied to educational support for women's health issues.
- Various manuscript types are welcome in either English or Korean: Systematic reviews, scoping reviews, methodology papers, concept papers, experimental research, qualitative research, action research, etc.

### Guest Editor:

Dr. Sookjung Kang (Professor, Ewha Womans University, Seoul, Korea)

### Important dates

Deadline for submission of papers: **31<sup>st</sup> Dec 2022**

Notification of acceptance: **15<sup>th</sup> Mar 2023**

Deadline for submission of final version of accepted papers: **15<sup>th</sup> Apr 2023**

### Submission guidelines

Submissions should be prepared according to the author instructions available at the journal homepage, <https://www.kjwhn.org/authors/authors.php>. Typical length of a manuscript is 14–15 pages.
